Comment on strengths and weaknesses of the instructor	Mr. Massari was an excellent professor. He made learning a tough subject very straight forward and he always explained each topic very well. He provide me with all tools and resources I needed to succeed in the course. He was very open to helping his students and always put his students first. I will miss his class.

Comment on strengths and weaknesses of the instructor	Knows what he's talking about and explains things well if asked questions, but the classes aren't interactive.
Comment on strengths and weaknesses of the course	If you misunderstand one topic it can ruin your performance in many topics that build on it, and there is no review throughout the class so knowledge doesn't get reinforced.
